

Indoor Air Quality

Pine Island Public Schools is proud to be taking a leadership role in providing a safe, comfortable, and productive environment for our students and staff so that we achieve our core mission—educating students. Our school will follow the EPA guidance to improve our indoor air quality by preventing as many IAQ problems as possible, and by quickly responding to any IAQ problems that may arise. Good air quality requires an ongoing commitment by everyone in our school, because each of us daily makes decisions and performs activities that affect the quality of the air we breathe.

School staff, students, and parents can obtain checklists for self-help information so they can properly evaluate their child's home or other out-of-school situations by contacting the school. Staff and parents can also obtain information about school facility construction, maintenance and housekeeping practices, chemicals used, mold, and HVAC related information, chemical producing academic subjects, and pesticide and herbicide applications to determine the extent to which school activities contribute to a child's symptoms by contacting the school.

The Pine Island Public Schools Indoor Air Quality Coordinator is Scott Stockdale. If there are any questions regarding the school's IAQ Program, please feel free to call the school at (507) 356-4849.
